

Legacy NPS Formulary Updates

EFFECTIVE 4/8/20

This document includes new medication additions and changes made to previous formulary medications and should be used in addition to the **Legacy NPS Formulary Booklet**. Updates included here are considered the most accurate and up-to-date in comparison to the formulary booklet.

The formulary groups medications by the conditions they treat. Each medication is placed in a tier that indicates the amount you pay to fill a prescription as determined by your employer or health plan. Please reference this chart as you review the following formulary updates.

Tier 1

Lowest-cost medications

Tier 2

Midrange-cost medications

Tier 3

Highest-cost medications

New medications being added

New medications approved by the FDA are reviewed on a monthly basis to determine placement on the formulary. The following medications are now included on the Legacy NPS Formulary. This list does not guarantee coverage under all plans.
